

I couldn't choose what to do
So I made a list of just 'a few'
problems, issues that bother me
and probably bother the 'we'

Climate Change
is at the stage
where the leaders, politicians
should join the mission
to plant trees

reduce excessive plastic across the seas
But why haven't they participated?

It is greed, wealth, power: all this time wasted
For the consumption of 'a few'

But not for the next generations to come: what will they do?

Across the world there are campaigns
for Education, knowledge - all this pain

to enhance the misfortunate and developing countries

Doesn't everyone deserve the chances we get: but there are fees

Holding the world back from unity

Why is nothing done to end this: will it all end in mutiny?

We, the people deserve equality

No racism, facism but solidarity

Everyone to be treated the same

But why, why are people bias, impertinent and only focused on their gain?

Pushing you out of the way

And may I just say,

Why have the Politicians not resolved the issue that will lead us to extinction?
Have they not heard ^{about} the Paticians?

Why is nothing done to teach the future

And stop the mess of exasperation going to her

Him, we, and you want the treatment
of honesty, respect and fair greetment

Why is no one listening to our screams?

Agony in all means
remorse is yet to come
if we do not open our ears

In time.
